Objective 2: Seeking Solutions Through Technology

We want to equip our students to participate in a rapidly changing world, where work and leisure activities are increasingly transformed by technology;

We enable students to find, explore, analyse, exchange and present information;

We focus on developing skills to create and use information in a discriminating and effective way;

To create opportunities to develop critical thinking skills;

To provide learning tasks that challenge online problem-solving skills;

To develop online research and data gathering skills;

To infect students with the desire to become self-directed learners in the worldwide digital and technology space;

To foster a growth mindset towards the use of technology for students and our parent community;

To extend and connect student real world learnings through various STEM and community projects.
